SIEMENS

Electrical Actuators

for Combi-valve types VPI45...

SSD31.. SSD81.. SSD61..

- SSD31.. operating voltage AC 230 V
- SSD81.. operating voltage AC 24 V
- 3-position control signal 3-position control signal
- DC 0...10 V control signal
- operating voltage AC/DC 24 V Nominal force > 250 N

• SSD61..

- · Automatic identification of valve stroke
- · Direct mounting with union nut, no tools required
- Basic types complete with plug-in connecting cable, length 1.5 m
- Optional cable types
 - cable length 1.5 m, 2.5 m and 4.5 m
 - halogen-free cables
- Manual override and position indication
- · Parallel connection of multiple actuators possible

Use

For operation of Siemens valves VPI45.. for water-side control of hot and cooling water in heating, ventilation and air conditioning systems.

> **Building Technologies HVAC Products**

Type summary

Standard versions

Type reference	Operating voltage	Positioning time at 50 Hz	Control signal	Connecting cable
SSD31	AC 230 V		3-position	1.5 m
SSD31/00 ¹⁾	AC 230 V	150 s		no cable
SSD81	AC 24 V			1.5 m
SSD81/00 ¹⁾	AC 24 V			no cable
SSD61	AC / DC 24 V	75 s	DC 010 V	1.5 m
SSD61/00 ¹⁾	AC / DC 24 V			no cable

¹⁾ Available cable lengths or terminal block connectors refer to «Accessories», page 2

SSD81.., SSD61.. are UL and cUL approved.

Accessories

Type reference	Description	Operating voltage	Control signal	
ASY3L15	Connecting cable 1.5 m			
ASY3L25	Connecting cable 2.5 m	AC 230 V	3-position	
ASY3L45	Connecting cable 4.5 m	1		
ASY6L15	Connecting cable 1.5 m			
ASY6L25	Connecting cable 2.5 m			
ASY6L45	Connecting cable 4.5 m	AC / DC 24 V	DC 010 V	
ASY6L45HF	Connecting cable 4.5 m, halogen-free, VDE 0207-24			
ASY8L15	Connecting cable 1.5 m			
ASY8L25	Connecting cable 2.5 m			
ASY8L25B	Connecting cable 2.5 m with Batigyr connector	AC 24 V 3-position		
ASY8L45	Connecting cable 4.5 m			
ASY8L45HF	Connecting cable 4.5 m, halogen-free, VDE 0207-24			
ASY98	Retaining screw for terminal block connectors			
ASY99	Terminal block connector for 3-position actuator SSD81/00 (AC 24 V)			
ASY100	Terminal block connector for DC 010 V modulating actuators SSD61/00			

Ordering

Example: 2 actuators without cable SSD81/00 and 2 terminal block connectors ASY99

Delivery

Actuators, valves and accessories are packed separately. Items are supplied individually packed.

When ordering, please give quantity, product name and type reference.

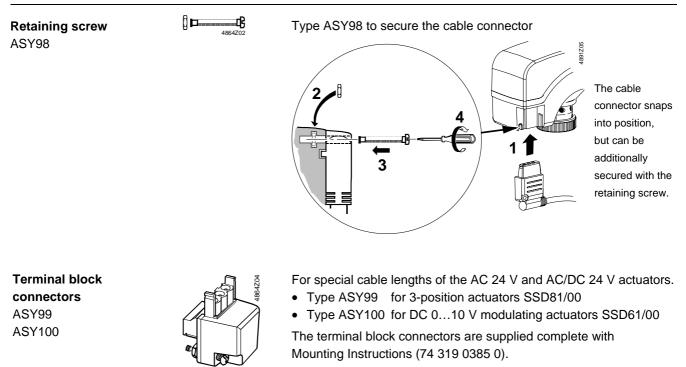

Equipment combinations

Type reference	Valve type	V ₁₀₀ [l/h]	PN class	Data sheet
VPI45	Combi valves	75 3000	PN25	N4853
VPI45Q	Combi valves with P/T plugs	755000	11125	114000

 \dot{V}_{100} = volumetric flow, in I/h, through the fully open valve (H₁₀₀)

Accessories

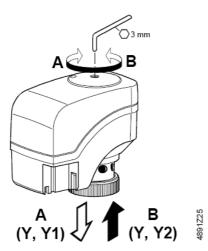

Engineering	The actuators must be electrically connected in accordance with local regulations (refer to «Connection diagrams»), page 7.
riangle Caution	Regulations and requirements to ensure the safety of people and property must be observed at all times!
	The permissible temperatures (refer to «Technical data», page 6) must be observed. The connecting cable of the actuator may come into contact with the hot valve body, provided the temperature of the valve body does not exceed 80 °C.
Mounting	The Mounting Instructions 4 319 0644 0 are enclosed in the product packaging. Assembly is made with the union nut; no tools or adjustments are required. The actuator must be fitted in position 0 (also refer to «Manual override», page 5) without operating voltage. In the case of actuators without connecting cable (SSD/00), the separately ordered terminal block connector and connecting cable must be fitted.
Orientation	
Commissioning	When commissioning, check wiring and the functioning of the actuator.
	 Actuator stem extends (from position 0 to 1): Valve opens Actuator stem retracts (from position 1 to 0): Valve closes
Self-calibration	During commissioning and whenever the operating voltage is switched on, the SSD61 runs a self-calibration routine. (Valve stroke $0 \rightarrow Max$. stroke \rightarrow Setpoint). Never intervene manually in this process.
Note: Correct calibration is only possible • with valve • stroke > 1.5 mm	The second or third attempt at calibration occurs automatically after an 8-minute delay. After three failed calibration attempts the actuator stem remains in the extended position and the VPI45 valves are opened. For valves with strokes < 1.5 mm, the actuator/valve combination locks after three failed calibration attempts.

Manual override

A 3 mm hexagonal socket wrench can be used to move the actuator to any position between 0 and 1. If a control signal from the controller is present, then this takes priority in determining the position.

Note To retain the manually set position, unplug the connecting cable or switch off power and the control signal.

Position indicator in position 0: Valve closed

Position indicator in position 1: Valve open

Maintenance

The actuators are maintenance-free.

When carrying out service work on the plant, following must be noted:

- Turn power off (e.g. remove the plug)
- If necessary, disconnect electrical connections from the terminals
- The actuator must be commissioned only with a correctly mounted valve in place!

Repair

Disposal

Warranty

SSD.. actuators cannot be repaired; the complete unit must be replaced. Broken connecting cables can be replaced, see «Accessories», page 2.

The device must not be disposed of together with domestic waste. This applies in particular to the PCB.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

The technical data given for these applications is valid only when the actuators are used with the Siemens valves listed under «Equipment combinations», page 2.

The use of the SSD.. actuators in conjunction with third-party valves invalidates any warranty offered by Siemens Switzerland Ltd / HVAC Products.
